New Product News

S101 Cover

In 2010, Master Lock Safety Solutions launched an extreme environment padlock cover for the S30 safety padlock series. The S30COVERS prevent dust and debris from entering the keyway or shackle holes of a padlock, preventing a common cause of padlock failure and prolonging padlock life. Since the original launch, we have sold thousands of extreme environment covers. This innovative product has now been extended to all of Master Lock's top selling safety padlocks.

Master Lock is pleased to announce the launch of the new lineup of **Extreme Environment Padlock Covers!**

Three new models will be added to our product offering: 400COVERS (fits 410, 406 series), 411COVERS (fits 411 series) and S101 (fits A110, 6835 series). Padlock covers are constructed from a ultra-durable TPE material and feature an all new attached key cap cover – no need to remove the bottom of the cover to gain access to the key hole!

Products are available to order!

Frequently Asked Questions

What are some main features of these extreme environment padlock covers?

Extreme environment padlock covers feature dual strap connectors which increase durability and minimize the obstruction of the padlock labels or laser engraving on the back face of the padlock. A tight seal around the shackle seals the shackle holes to keep unwanted dust and grime out. The removable attached keyway cap allows for easier access to the keyway and keeps out unwanted dust and debris. The keyway cap also features a drain hole that allows water to easily drain from the cover.

What are the extreme environment padlock covers constructed from?

These extreme environment padlock covers are constructed from a ultra durable thermoplastic elastomer (TPE) that preforms effectively in extreme environments.

What padlock series can be used with these covers?

There are three new models that will be introduced to fit our top selling Master Lock and American Lock safety padlock series. The 400COVERS will fit the 410 and 406 safety padlock series (including all shackle size options). The 411COVERS will fit the 411 safety padlock series (including all shackle size options). The S101 will fit the 6835 and A1100 safety padlock series (including all shackle size options).

**note – the COVER option is not available on the #3 safety padlock series*
